Penjelasan Pertemuan 7

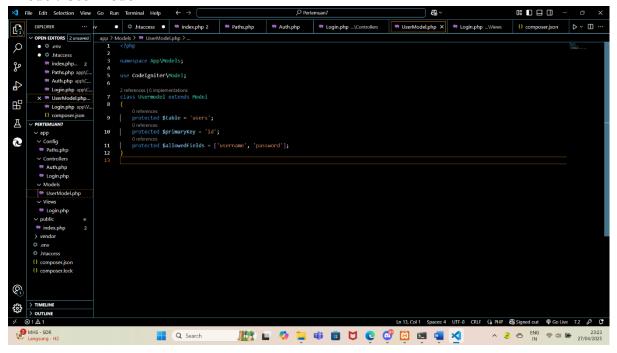

1. Controller: Auth

```
## Controllers
| Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers | Controllers |
```

Controller Auth menangani proses login dan logout pengguna.

- Metode login(): Menampilkan halaman login.
- **Metode loginSubmit()**: Menerima data dari form login, memverifikasi kredensial pengguna, dan mengatur sesi jika valid.
- **Metode logout()**: Menghancurkan sesi pengguna dan mengarahkan kembali ke halaman login.

2. Model: Usermodel

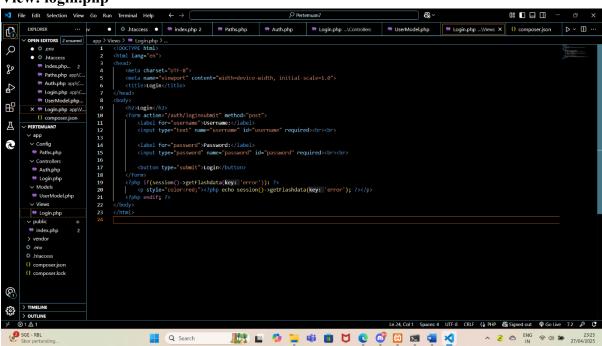

Model Usermodel berinteraksi dengan tabel users di database.

• Properti:

- \$table: Nama tabel yang digunakan.
- \$primaryKey: Nama kolom yang menjadi primary key.
- \$allowedFields: Daftar kolom yang dapat diisi secara massal.

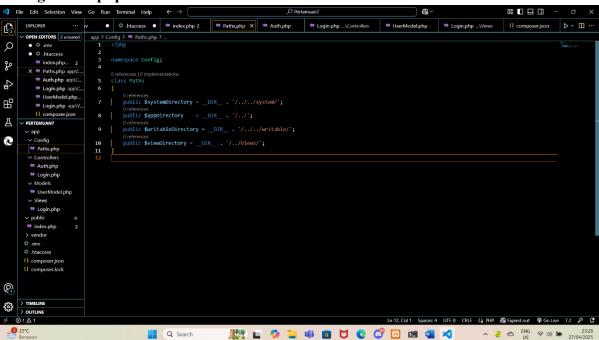

3. View: login.php

View login.php menampilkan form login kepada pengguna.

- Form Input:
- Username: Field untuk memasukkan nama pengguna.
- Password: Field untuk memasukkan kata sandi.
- Pesan Error: Menampilkan pesan kesalahan jika login gagal.

4. Config: Paths.php

File Paths.php mendefinisikan jalur direktori penting dalam aplikasi.

- Properti:
- \$systemDirectory: Menunjukkan direktori sistem.
- \$appDirectory: Menunjukkan direktori aplikasi.
- \$writableDirectory: Menunjukkan direktori yang dapat ditulis.
- \$viewDirectory: Menunjukkan direktori view.
